

Four-product evidence ladder and local boundary

	CSR	GSFC	GFZ raw	GFZ leakage	JPL CRI	Local	Claim class
NCP / Beijing	Sign+	Sign	Sign	Sign	Auth boundary	High mechanism	Mechanism anchor
Tokyo Bay / Yokohama	Material	Sign	Sign	Sign	Auth boundary	Rising wells	Sign-supported coastal case
Mumbai / Bhayandar	Material	Weak sign	Sign	Sign	Auth boundary	Contradicts recovery	Candidate-only boundary
Delhi	Material	Material	Sign	Sign	Auth boundary	Depletion	Product-material depletion
Lahore / Punjab	Material	Near/sign	Sign	Sign	Auth boundary	Borehole + InSAR	Regional depletion review

JPL CRI is an official PO.DAAC product but remains an authentication boundary in this run. The ladder tiers claims; it does not turn regional storage into city-scale groundwater heads.
