

Product-consensus robustness: sign support is not materiality proof

a CSR materiality vs GSFC magnitude

b All-city product comparison

c Product-consensus ledger

CSR-material units	6/6
GSFC sign-supported	6/6
GSFC-material units	1/6
GSFC near-material	2/6
Positive coastal units	3/3
Positive GSFC-material	0/3
All-city sign agreement	0.80

GSFC is an independent sign check here. It does not prove that every CSR-material screening unit is material under an independent product.
