

GHSL polygon and GSFC mascon robustness

a GHSL urban-centre match

b Independent mascon sign check

c Data-status ledger

GHSL polygon matches	444/444 cities
Material point hotspots	6
GHSL material UCs	5
CSR-GSFC hotspot sign	6/6 match
Full robust grade	6/6
JPL CRI status	auth blocked
JPL is not treated as failed science; it is a credential boundary. No multi-mascon claim includes JPL unless Earthdata-authenticated data are ingested.
