

Product-consensus robustness: sign support is not materiality proof

a CSR materiality vs GSFC magnitude

b All-city product comparison

c Product-consensus ledger

CSR-material hotspots	6/6
GSFC sign-supported	6/6
GSFC-material hotspots	1/6
GSFC near-material	2/6
Positive coastal hotspots	3/3
Positive GSFC-material	0/3
All-city sign agreement	0.80
JPL CRI status	auth boundary
GSFC is an independent sign check here. It does not prove that every CSR-material hotspot is material under an independent product.
