

Global cancellation hides a regional groundwater-liquefaction review payload

a Global sign-resolved screen

b Global null, regional payload

Global mean ΔP_{liq} **+0.00042**

Geographic null **$p = 1.00$**

A/B follow-up population **98.2M**

No diffuse global-amplification narrative is supported;
review need emerges after regional grouping.

c Evidence contraction

Seismic urban exposure units **444**

Directionally detectable **311**

A/B follow-up point units **28**

50-km metro clusters **21**

GHSL urban centres **22**

300-km regional groups **10**

Interpretation scale contracts from city exposure markers to GRACE-scale regional groups.
